

April 27, 1993

Dear Residents:

The U.S. Environmental Protection Agency (EPA) is holding a public meeting tomorrow evening to discuss the lead contamination cleanup work that will begin next week in Eagle Park Acres. The meeting will start at 7:00 pm and will be held at the Eagle Park Improvement Association building at the rear of 100 Hill Street.

The EPA plans to remove hard rubber battery casings from the yards and driveways of approximately 8 homes in Eagle Park Acres. The EPA is digging up the battery casings because they are a health risk to children exposed to them. The EPA will monitor the air at the work sites to make sure the dust control measures that they are using are effective. The cleanup work is expected to be completed in about 4 weeks.

Thank you.

Sincerely,

Philip Schutte
